

NOKIAN PRODUCTS FOR ELECTRIC AND HYBRID CARS

SEASON 2019 - 2020

nokian[®]
TYRES

HYBRID/EV TYPE CODES:

- BEV** Battery Electric Vehicle
No IC engine. Relies on energy stored in battery to provide propulsion via electric motor(s). Recharged from electricity grid.
- MHEV** Mild Hybrid Electric Vehicle
IC and electric motor(s) working in parallel. Not able to drive under electric power alone. Electric assistance greater than 5kW, but less than 30kW. Typical figure is 10kW to 15kW.
- FHEV** Full Hybrid Electric Vehicle
IC and electric motor(s) working in parallel. Can be driven for short distances under electric power alone. Electric assistance greater than 30kW. Typical electric assistance ranges from 60kW to 165kW.
- PHEV** Plug-in Hybrid Electric Vehicle
Full hybrid electric vehicle with larger battery pack which can be recharged from the electricity grid thereby enabling a longer electric-only driving range.
- EREV** Extended Range Electric Vehicle
IC and electric motor(s) working in series. A battery electric vehicle with an on-board charger (usually IC engine + generator) for the battery pack to enable longer range than BEV.
- FCEV** Fuel Cell Electric Vehicle
Similar to a BEV but the battery is replaced by a fuel cell. The fuel (typically hydrogen) is processed on-board in a stack of fuel cells to generate electricity for powering the electric motor(s).
